[Collabera Digital](#)

Wedding, MapDB, MapView

- Project Description
 - **Wedding** program is a system where all the measurement result files from every process of wafer manufacturing (Front End, Back End) are wedded.
 - **MapDB** is a solution that can keep track of all the wafer inspection results from different machines (measurement)
 - Find the detected defect of the wafer from the measurement result file.
 - Where we can identify total bad chips in every measurement.
 - Provide an overview of the wafer die map (Good Chips, Bad Chips, etc...)
 - **MapView** A tool for the user to view and verify all the measurements uploaded into MapDB for a particular lot number.
- Technology Used.
 - Asp.net MVC Framework 4.5, .Net Core 6, C# Window
 - MSSQL
 - Agile, Scrum
- Responsibilities
 - Focuses and completes work on time.
 - Understands the basic features of the system.
 - Collects information and identifies the work related to systems.
 - Collaborates with individuals inside the team to complete the team's work.
- Role
 - System Analyst
- Version Control
 - Azure DevOps

Main Specialization

- ASP.NET(C#)
- ASP.NET Core
- Angular

Programming Languages

- C#
- Angular

Databases

- MSSQL
- MySQL

Cloud Services

- Azure
- AWS

Previous work experience

Jan 2023 - Present

System Analyst

[Qualcomm](#)

I immersed myself in the semiconductor industry and gaining deep insights into chip production. I also honed my skills in agile routing and Scrum methodologies, leading to efficient project delivery.

Jan 2021 - Nov 2022

ASP.Net API Developer

[OnePay](#)

I gained extensive experience within the FinTech environment, Payment system, and working on live banking applications. I adeptly handled user issues and deployed applications serving thousands of users, significantly improving their experience.

Nov 2017 - Dec 2020

Web Application Developer

[Myanmar High Society](#)

Starting as an intern, I quickly leveraged my learning to secure my first role.

Throughout my journey, I gained diverse experiences and took on various overseas projects, collaborating internationally with teams in Singapore and Japan.

ASP.Net API Developer

[Onepay](#)

Onepay App, Business App, Admin Web portal

- Project Description
 - [Onepay](#) is a lifestyle application connecting users and businesses.
 - Its mobile money app offers a digital experience and lets you store, transfer, and spend money straight from your smartphone.

 - It has a lot of features one-touch in-app purchases and professional customer services that meet users' requirements.
- Technology Used.
 - Net Core 2.0
 - Asp.net MVC Framework 4.5
 - MySQL 5.6
- Responsibilities
 - Discuss project flow and design with BA and project manager depending on the user requirement, Jira Story.
 - Implement and Test Web APIs for React Client Application by Jira Story within the deadline
 - Test APIs and fix bugs proposed by the tester and project manager's review.
 - Third-party integration
 - Support UAT and production deployment
- Role
 - Asp.Net API Developer
- Version Control
 - SVN

Web Application Developer

[Myanmar High Society](#)

Shopdoora e-Commerce App

- Project Description
 - [Shopdoora](#) is a complete e-commerce system for buyers and sellers with various platforms such as Web, Android, and iOS.
 - It has a very nice and easy e-commerce system that allows buyers to buy with various integration payment platforms.
 - The seller can check all orders and payment info from its seller app.
- Technology Used
 - Asp.Net Core(Web API Service)
 - Entity Framework Core
 - MSSQL
- Responsibilities
 - API integration & development
 - Payment Gateway Integration
 - Database design
 - Support UAT
- Role
 - Senior Asp.net Developer

Jan 2021 - Nov 2022

Nov 2017 - Dec 2020

- Version Control
 - Git

BCA (Offshore development for Singapore)

- Project Description
 - **BCA** is a building and construction authority project for the Singapore Government.
 - It targets building and construction authorities.
 - Public for license, permit, and certification applications to BCA for approvals.
 - Information on Building Environment.
- Technology Used
 - Asp.Net (Web API Service, Microservice)
 - MSSQL, Stored Procedure
 - Angular (Prime-NG Angular UI component)
- Responsibilities
 - Developed both frontend and backend for the specified modules.
 - Analyse Technologies to meet the project requirements with the best performance
 - Support UAT
- Role
 - Senior Web Application Developer
- Version Control
 - SVN

Voxer OMS (Offshore development for JAPAN)

- Project Description
 - Voxer OMS is an order management system that works with Salesforce Commerce Cloud.
 - It targets Business-to-Consumer (B2C) e-commerce across digital channels.
 - Order management function consists of B2C business processing information and master information.
 - Business Processing Information Management, Sales order acceptance, Processing shipment, Creating Invoice, Confirming payment, and Periodic work.
- Technology Used
 - Ruby on Rails
 - MySQL
 - Angular (Angular Material, Angular Flex-Layout)
 - jsPDF - A library to generate PDFs in JavaScript
 - Agile Methodology
- Responsibilities
 - Analyse System Requirements
 - Analyse Technologies to meet the project requirements with the best performance
 - Structure database design
- Role
 - Full support development for the shipping information module.
 - Support UAT
- Version Control
 - Git

eHealth Assist (Offshore development for SINGAPORE)

- Projection Description
 - E-Health Assist is a Health System Management project
- Technology Used
 - ASP.Net, MVC, Bootstrap CSS, Query, MSSQL

- Responsibilities
 - Analyse Technologies to meet the project requirements with the best performance.
 - Full support was developed for Survey Forms' responsiveness and assistance to seniors.
- Role
 - Junior Developer

Yay Pan Sar

- Project Description
 - **YayPanSar** is an online shopping mall where you can buy and sell everything you want in-app.
 - Easy to use and comfortable to shop from home.
- Technology Used
 - HTML, CSS, MVC5, Bootstrap, JavaScript, Microsoft SQL, Asp.net.
- Responsibilities
 - Analyse Technologies
 - Develop both frontend and backend for specified modules under senior guidance.
- Role
 - Junior Developer

Education

B.C.Sc

Dec 2012 - Dec 2017
